# How does Procalcitonin help our Daily Management of Patients with SIRS?

by

## Professor Michael Meisner

Director, Department of Anaesthesiology and Intensive Care Medicine of  
Hospital Dresden-Neustadt, Dresden, Germany

The latest clinical use of procalcitonin is to guide clinicians to start and stop empirical antibiotic use in patients with SIRS, it helps to differentiate infectious cause of SIRS from other non-infectious causes. It is also one of the recommendation from the various international guidelines in management of severe sepsis / septic shock. How does this work? .....
